La contraception et le planning familial	14
La famille	20
Soins intimes	23
Des maladies / infections sexuellement transmissibles	27
Les agressions sexuelles	28
La pornographie et la prostitution	31

DESCRIPTION

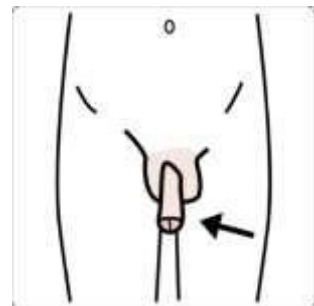

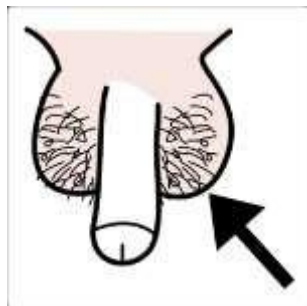

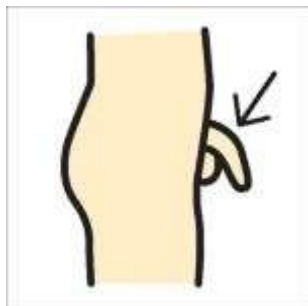

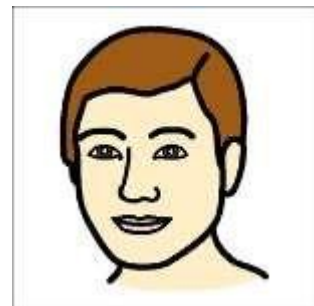

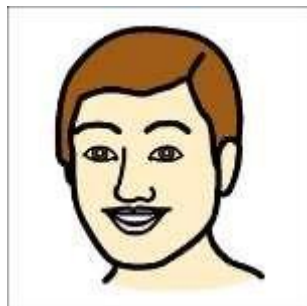

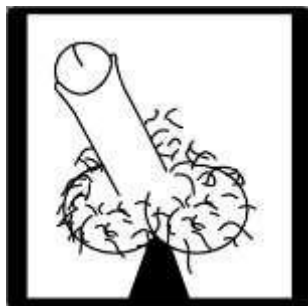

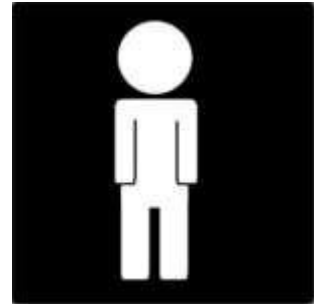

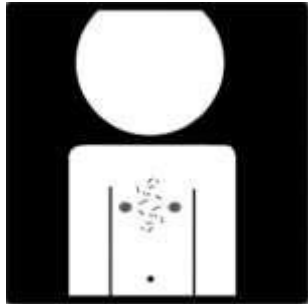

La banque d'images TRASE est une sélection de pictogramme sur le sujet de la sexualité, de la santé sexuelle et de l'éducation sexuelle. Les pictogrammes ont été sélectionnés à partir de l'outil Picto-Selector © par M.C. Van der Kooij, qui fournit plus de 28 000 pictogrammes sur différents sujets.

La banque d'images TRASE est censée être utilisée comme support visuel pour l'éducation sexuelle et peut être utilisée par les parents, les formateurs, et les professionnels afin de fournir des informations sur la vie affective et relationnelle aux personnes handicapées, avec des difficultés d'apprentissage ou avec l'autisme. Les personnes avec autisme ou des difficultés d'apprentissage peuvent également utiliser ces matériaux par eux-mêmes, par ex. pour apprendre à connaître la sexualité, des comportements appropriés ou l'hygiène personnelle.

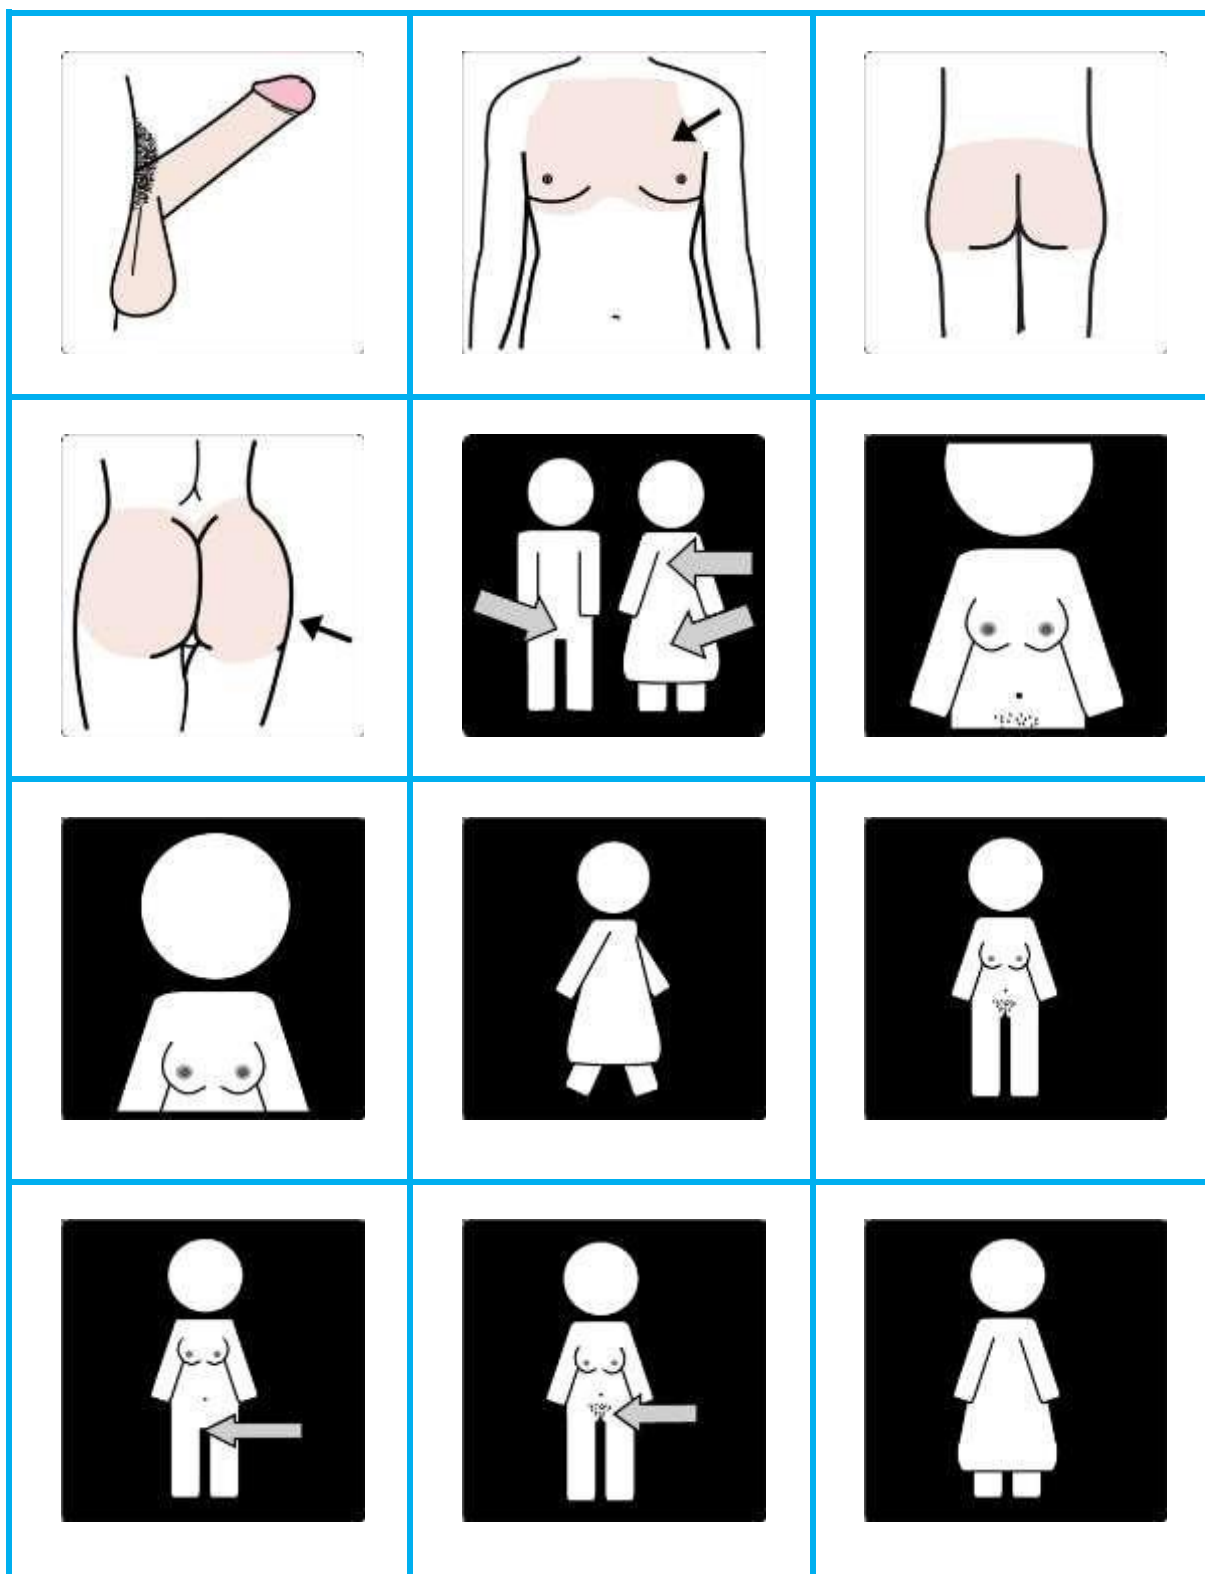

Cet outil vise également à fournir des exemples précis d'images très claires et simples concernant la sexualité, toute en offrant une bonne sélection de possibles scénarios avec un accès rapide pour les utilisateurs potentiels. Ainsi, les pictogrammes ont été classés selon différents thèmes.

Pour personnaliser ou étendre les pictogrammes, l'outil Picto-Selector © peut être téléchargé gratuitement sur: <https://www.pictoselector.eu/home-2/download/>.
